

Welcome to the latest issue of E-News.

In this issue we take a look at some recent additions to our vast product offering, from Wearnes Cambion, ITW ActiveMetal™ and L-3 ElectroDynamics. We also continue to build strong supplier relationships with the announcement of our appointment as UK distributor for HellermannTyton.

For our complete product range, please visit our website www.aerco.co.uk. To request our Line card or for your enquiries please email sales@aerco.co.uk.

L-3 ElectroDynamics products now available

L-3 ElectroDynamics command, control and communication products for the defence, aerospace and homeland security markets are now available from stock.

Products include elapsed time indicators and event counters that are ruggedised and hermetically sealed to exceed Mil-M-7793 environmental standards for shock, vibration and temperature. Low voltage models are also available.

We also supply non-volatile status indicators, LEDs, and large display status and infra-red secure lighting indicators.

HellermannTyton appoints Aerco

We have been appointed as a UK distributor for HellermannTyton, the leading global manufacturing company with a comprehensive cable management product portfolio that includes fastenings, fixings, and identification and protection products.

Andy Gale, our cable and wire business manager announced "HellermannTyton is always striving to be one step ahead of its customers' requirements. Its strong research and development capability and a highly innovative product range of more than 20,000 products allow the company to achieve this goal. We are confident that the agreement with Aerco will strengthen the HellermannTyton brand in the UK."

New vandal-proof keypads

As a franchised distributor for ITW Switches, we now supply ActiveMetal™ keypads, a new generation of raised profile, solid-metal, vandal-proof keypads that use ActiveTouch™ technology to provide the highest possible standards in terms of ruggedness, reliability and resistance against weather and vandalism.

Designed for indoor and outdoor access control, kiosks, point of sale terminals, ATM machines and security alarms, ActiveMetal keypads are also ideal for applications in the industrial and commercial sectors, medical establishments, and the security and prison services.

New filter terminal

We now supply a new filter version of the popular thread-mounted, feed-through PCB terminal from Wearnes Cambion suitable for many applications in professional electronic equipment, including signal and passenger information systems in the rail industry.

These new filter terminals are offered with a wide choice of capacitance values and EMC to extremely tight tolerance. They are ideal for use in telecommunications, military, automotive, and the oil and gas, computing and food industries.
