Aerco helps BAE Systems with component specification

The Panavia standards which are used by BAE Systems, Air Systems companies, to accurately define components used in the Tornado aircraft.

We hold the complete library of Pan-Spec drawings online enabling us quickly and accurately cross-reference the Panavia numbers to original manufacturers' part numbers.

We can also track the manufacturing status of these items, and can make alternative component suggestions should Pan-Spec items become obsolete or unavailable.

Use Aerco to assist with all your Panavia requirements.

CECC marine backshells

- Fit the full range of marine bronze D38999 type connectors, which are qualified to CECC75201-002
- Standard strain relief clamps offering cable support
- Heat-shrink adaptors
- Angled adaptors
- Screened adaptors
- High performance EMI/RFI shielded adaptors, includes the popular TAK heat-shrink kit that allows single-piece installation of a shielded adaptor and integral heatshrink boot.

Customer Survey

In order to continue providing you the very best levels of service, we would appreciate just a few moments of your time to complete our online customer survey.

Every completed customer survey we receive, we will donate £1.00 to St Catherine's Hospice - a local charity dedicated to providing specialised palliative care and support to patients and families and with whom we have developed a close association with.
