New connector manufacturing agreement means shorter delivery times

Thanks to a manufacturing agreement, Hypertac's HPD and HPF printed circuit board connectors are now available from us, with a typical lead-time of just two weeks.

As an authorised assembling distributor of these popular, high-performance connectors, we expect the improved availability will be highly significant in market sectors such as the military and aerospace. We also offer full technical support and after sales service in this sector, which is increasingly reliant on commercial off-the-shelf components in its quest to drive down costs and time to market.

Wire and cable products provide a total interconnect solution

With the additional wire and cable products to our portfolio, including equipment wire, coax and multi core cables, and a range of wire management and heat shrink products, we are now well positioned to meet the industry demand for these products.

Aimed primarily at our traditional market areas of rail, aerospace, military vehicles and equipment, we can provide a total interconnect service that includes products from leading, world-class manufacturers such as Alpha Wire, Tyco Electronics and Thermox CDT. Specifications include Mil spec / Def Stan and UL/CSA approved across all ranges.

Going round the bend with new endoscope from Aerco

We are delighted to announce the availability of the ProVision Endoscope PV2, highly affordable inspection scopes from CML. Designed for investigating areas that cannot be seen by the naked eye, the endoscope is ideal for applications as diverse as inspecting between car door panels, cavity walls, under floorboards and around corners. It also proves useful in automotive applications such as engine and fuel tank examination.
