

## Welcome

With our ever increasing franchise partnerships and product ranges, it is important to keep you updated with the latest news at Aerco so you can benefit from our wealth of information and depth of knowledge.

With a website that is constantly being updated, you can be sure to find the latest information on all our product ranges, franchises and services:

- We have updated our product data sheets, which are available in PDF format.
- Check if we have stock of a part you are looking for by using our online product search.
- Existing account holders, the easiest way to track your orders online is with our online account access.

For more information, visit us at [www.aerco.co.uk](http://www.aerco.co.uk) or email us at [sales@aerco.co.uk](mailto:sales@aerco.co.uk)

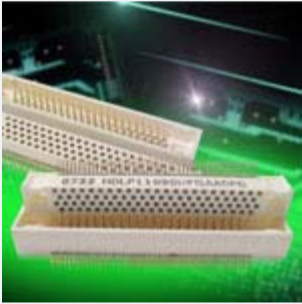

## Aerco wins ITW Switches franchise and significantly enhances switch portfolio

Aerco has been appointed as a European franchised stocking distributor for ITW Switches.

ITW Switches UK designs and manufactures a broad range of standard switch and switch panel assembly products, including push-button, rocker, slide, rotary, snap-action and sealed switches, supplying the automotive, aerospace, military and control and instrumentation markets.

## Increased interconnection density with new PCB connectors

We can now offer the HDLP range of low profile, high density, rectangular PCB connectors from Hypertac that are designed for use in applications where small, low mating force connectors with low and stable contact resistance are required.

The Hypertac HDLP connectors offer up to 2,000 mating cycles, excellent fretting corrosion resistance and are sealed to IP67 when mated. They are particularly suitable for missile guidance and propulsion systems, ruggedised computer systems, cameras, display systems, communications panels and enclosures.

## New high-performance DC fan

ADDA's latest 12VDC, 60mm fan is now in stock. Thanks to a combination of improved venturi design and a higher specification motor, this fan has an airflow capacity of 12.5% greater than its predecessor against 20% higher system pressure.

## Full range of circuit protection products

Aerco stocks a comprehensive range of high quality fuses and circuit protection devices. A source of reliable protection devices is vital at a time when many cheap imports are available that may not only provide inadequate protection, but may also create an extremely hazardous situation, the very thing a fuse is in place to prevent.

Aerco has concentrated on building a portfolio of fuses from world-class companies such as BLP, GE Power, Cooper Bussmann and Littlefuse many of which are aircraft and NATO approved.
