

Aerco E News

Welcome

Have you ever wondered why our strap line is "How can we help?" If you have, the answer is simple, as an organisation we are dedicated to delivering real solutions to engineers and designers.

Offering a comprehensive range of stock, from many different manufacturers, at competitive prices is just part of being a top class distributor. However, at Aerco we go one step further...

- Worldwide sourcing
- Part number translation
- Kitting
- Kanban and JIT ordering
- Ship to line
- Fixed priced contracts
- Call-off orders
- Inventory management
- Connector assembly line
- Technical support

Contact our team to discuss any of our services, or product ranges, by visiting www.aerco.co.uk or emailing sales@aerco.co.uk

New blade design creates 'green' fan with low power consumption and reduced noise

We can now provide a new range of fans from Delta, which use a highly efficient, dual blade design. With improved aerodynamics that eliminate air flow separation, these new fans give a more efficient performance, by saving energy while reducing operating noise levels.

Spec 44 and 55 cable now in stock through new partnership with Tyco

As a result of a new trading partnership with Tyco, Aerco will stock high performance Spec 44 and Spec 55 cables. This means we can now offer a comprehensive wiring product range for aerospace applications, with a wide choice of conductor sizes and insulation wall thicknesses.

New connectors specifically designed for high power applications

We now offer Hypertac's new HBB connectors, rated up to 750A for use in high power applications. Providing easy mating and quick release functionality, the durable design can deliver some 2,000 mating cycles. It is also able to combine high current handling with small physical size and high levels of environmental performance. This new range is particularly suitable for electric drives used in fighting vehicles, weapons, avionics, rail transport and automotive, as well as medical equipment.

New dual rocker and circuit breaker saves space and simplifies installation

The E-T-A type 3130 is a range of double-pole combined rocker switches and thermal circuit breakers, which can be re-set, available from Aerco. With several functions combined in a single component, this range saves space on control panels and similar equipment while reducing inventory and installation costs.
