

Welcome

If there is one thing we can be sure of these days it is that you can't be sure of what the weather is going to throw at us next! Thankfully, here at Aerco we pride ourselves on being a lot more reliable and dependable when it comes to sourcing those everyday and sometimes hard-to-find components.

We understand how important it is to get the right component for your application at the right time and the right budget. This is why we are proud to offer such an extensive range of products, including relays, connectors, fans and PCB sockets.

If you don't know where to start, we can also go one step further and help you specify the perfect component for your application making Aerco a one-stop shop for your sourcing requirements.

For our complete product range, please visit our website www.aerco.co.uk. To request our Line card or for your enquiries please email sales@aerco.co.uk.

One of the world's largest ranges of CECC and MIL SPEC relays

As the exclusive UK distributor for Hi-G, the Italian relay manufacturer, we now stock one of the world's largest ranges of CECC qualified and MIL SPEC relays.

Rated up to 10A, the Hi-G range is available at highly competitive prices, with no minimum order quantity and on a prompt lead time for your convenience. We also offer full technical support and even a custom-design service, for applications where a standard product may not fulfil your requirements.

Binder connectors ideal for machine applications

Our portfolio now includes an extensive range of Binder circular power connectors, specifically designed for machine applications. These high performance connectors are available in three to 24 pole formats, with either metal or plastic housings. They are ideal for applications such as Interbus modules, motion sensors, welding equipment, pressure and temperature sensors, pumps and machine and control systems. Shielded versions are also available for EMC compliance.

New bearing technology improves DC fans

The Delta range of DC equipment fans, which have already proven extremely popular in the UK market, has been further enhanced with the introduction of the AUB series. This improved range of DC fans benefits from a new Superflo bearing system that lengthens product life and improves airflow performance.

Measuring 60 x 92 x 25mm AUB fans are available in either conventional axial flow or centrifugal blower formats, with a maximum airflow of 7.58 litres/sec (16.11 CFM). Their product life is 50,000 hours, which is much longer than conventional sleeve bearings. These fans are RoHS compliant, making them ideal for cooling modern equipment in IT applications, desktops, PCs, CPU cooling and equipment housed in 1U sized enclosures. Waterproof versions are also available.

Staying connected with Wearnes Cambion cage jacks

We now supply Wearnes Cambion cage jacks - PCB mounted, single pole sockets that provide a highly reliable PCB connector, with multiple contact points to 60% circumference of the mating pin.

Used in conjunction with connector pins and shorting links, these cage jacks have a current carrying capacity of up to 32 amps and are available in many different versions and formats, to suit every application. Gold on tin or tin on gold plating options are available.
