

Welcome

And Happy New Year!

As we begin a potentially difficult New Year, we would like to take the opportunity to remind you of the many services we have to offer, to get you through this difficult time.

With an extensive range of products from over 35 different franchises, a DESIGNSUPPORT team of technical specialists, large stock holding facilities, connector assembly lines and customisation facilities, along with worldwide sourcing capabilities, we are the ideal partner for companies looking to procure electronic components and reduce their vendor base.

In this issue we feature the latest news on our range of cable, wire & accessories, EMI/RFI shielding, solenoids and optoelectronics & indicators.

For our complete product range, please visit our website www.aerco.co.uk. To request our Line card or for your enquiries please email sales@aerco.co.uk.

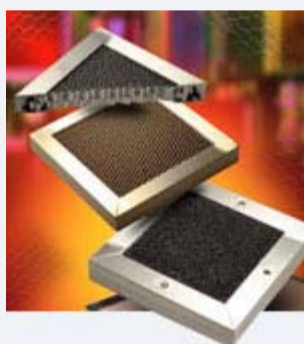

Aerco appointed as approved Alpha Wire distributor

We are delighted to announce that Aerco has been newly appointed as a franchised distributor for Alpha Wire. With Headquarters in the USA and European offices in the UK, Alpha Wire is a division of Belden Wire and Cable, and has been supplying cable products for over 70 years. With a product list of over 10,000 items, Alpha Wire delivers the industry's widest range of wire, cable and tubing products.

We now offer an extensive range of cable products from the tough, durable XTRA•GUARD® high performance electronic cables, to the manufacturing-critical Alpha Wire Industrial Series, and a comprehensive range of heat shrink products.

Top quality EMI/RFI vents for a wide range of applications

A comprehensive range of honeycomb EMI/RFI vents, from P & P Technology, is now available from Aerco. These top quality vents are ideal for commercial enclosures, screened rooms, military applications and shelters where high attenuation is required across a wide frequency range. High precision custom-built CNC drilling machines are used to manufacture P & P honeycomb attenuation vents to ensure the best possible quality and accuracy. Versions are available for TEMPEST and EMP applications.

New heavy duty solenoid introduced

We now stock the Series 147, a new high force and long stroke, open frame solenoid from Dialight BLP.

With a continuous closed power rating of 8W, this large (38mm x 30mm x 64mm), 12 to 24 VDC powered solenoid provides high force and long stroke capabilities, making it ideal for heavy duty applications. Pull and push versions are available, and the coil configuration is designed to offer a wide range of force and stroke options.
