

New connectors from Aerco designed for high power applications

Now available in the UK from Aerco are Hypertac's new HBB connectors that are rated up to 750A for use in high power applications. The HBB range provides easy mating and quick release with over 2,000 mating cycles and combines high current handling capability with small size and high levels of environmental performance.

Hypertac's HBB range is particularly suitable for electric drives used in fighting vehicles, weapons, avionics, rail transport and automotive and medical equipment.
