

New Franchise Partnerships

Hypertac

With more than 50 years of experience in the industrial and military markets, Hypertac is a leading supplier of world-class interconnect solutions in applications that require high levels of performance, quality and reliability.

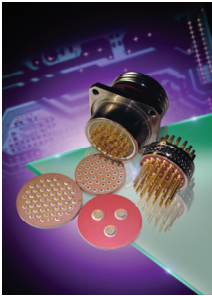

We now supply the full range of Hypertac connectors:

- Circular
- Rectangular
- PCB
- Modular
- ARINC connectors
- Discrete Contacts
- Assembly of Hypertac PCB connectors

Oxley Developments

Oxley Developments specialises in the design and manufacture of electronic components and systems including EMI/RFI suppression filters and connectors; LED panel indicator lamps; specialist PCB interconnect components; chassis and specialist PCB mounted filters; filtered connectors; planar capacitor arrays and EMI filter windows.

Aerco is the stocking distributor for four distinct product sectors of Oxley Developments:

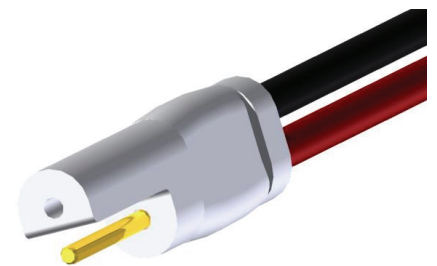

- A specialist range of electromagnetic interference suppression filters including a wide range of EMI/RFI filter solutions
- Advanced LED light source products that offer LED replacement for incandescent lamps plus a wide range of panel lamps
- An extensive range of surface mount and through-hole PCB interconnection products that are used in electronic and fibre optic applications
- The Oxley range of solid-state, non-volatile, military-proven electronic counters and elapsed time indicators

Wearnes Cambion™

Based in Castleton, Derbyshire, Wearnes Cambion is a long-established manufacturer of high performance, inductive components serving professional, military, aerospace and commercial markets.

Aerco is to stock and distribute:

- Inductors
- Coils
- Terminals
- High quality sockets and pins

Hi-G Italia Relays

Based south of Rome, Hi-G Italia produces high quality hermetically sealed relays to meet military and aerospace specifications.

Aerco supply the company's range of:

- Electromechanical relays
- Solid state relays
- Timers
- Sensors
- Regulators
