Fans & Thermal Management

ADDA manufacture a wide range of fans, blowers and accessories. Their range covers axial flow fans, tangential and centrifugal blowers, chip coolers, laptop fans, CPU cooling products and fan accessories. All ADDA fans are designed to meet UL CSA TUV CE and CUL requirements.

The Delta Fan and Thermal product line offers a full range of axial fans blowers and thermal management products. At Aerco we also have the ability to do small customisations such as casing modification, lead trimming, connector modification to name a few.

ETRI supply a wide range of standard axial and centrifugal fans, as well as high performance air conditioning applications. Specialising in the production of the fans for the electronics and military industry.
